Fourth Quarter 2022 Financial Results

Net revenue in the fourth quarter of 2022 was RMB2,404.0 million (US\$348.6 million), a 9.9% increase over the fourth quarter of 2021 of RMB2,187.4 million and a 1.5% increase over the third quarter of 2022 of RMB2,367.6 million. Service revenue in the fourth quarter of 2022 was RMB2,404.0 million (US\$348.6 million), a 10.0% increase over the fourth quarter of 2021 of RMB2,185.9 million and a 1.5% increase over the third quarter of 2022 of RMB2,367.6 million. The increase over the previous quarter was mainly due to the full quarter revenue contribution from additional area utilized in the previous quarter and the contribution from 10,685 sqm of net additional area utilized in the fourth quarter of 2022, mainly related to the Shanghai 17 (“SH17”) Phase 2, Shanghai 18 (“SH18”) Phase 1, Beijing 8 (“BJ8”), Langfang 4 (“LF4”) Phase 1, and Wuhan 1 (“WH1”) Phase 1 data centers.

Cost of revenue in the fourth quarter of 2022 was RMB1,916.0 million (US\$277.8 million), a 12.7% increase over the fourth quarter of 2021 of RMB1,700.1 million and a 2.2% increase over the third quarter of 2022 of RMB1,874.8 million. The increase over the previous quarter was mainly due to an increase in depreciation and amortization resulting from more data centers coming into service in recent quarters, as well as an increase in other components in cost of revenue, partially offset by seasonally lower utility cost.

Gross profit was RMB488.0 million (US\$70.8 million) in the fourth quarter of 2022, a 0.2% increase over the fourth quarter of 2021 of RMB487.3 million, and a 1.0% decrease over the third quarter of 2022 of RMB492.8 million.

Gross profit margin was 20.3% in the fourth quarter of 2022, compared with 22.3% in the fourth quarter of 2021, and 20.8% in the third quarter of 2022. The slight decrease over the previous quarter was mainly due to an increase in depreciation and amortization resulting from more data centers coming into service in recent quarters, as well as an increase in other components in cost of revenue, partially offset by seasonally lower utility cost.

Adjusted Gross Profit (“Adjusted GP”) (non-GAAP) is defined as gross profit excluding depreciation and amortization, operating lease cost relating to prepaid land use rights, accretion expenses for asset retirement costs and share-based compensation expenses allocated to cost of revenue. Adjusted GP was RMB1,224.7 million (US\$177.6 million) in the fourth quarter of 2022, a 6.6% increase over the fourth quarter of 2021 of RMB1,148.4 million and a 1.9% increase over the third quarter of 2022 of RMB1,201.3 million. See “Non-GAAP Disclosure” and “Reconciliations of GAAP and non-GAAP results” elsewhere in this earnings release.

Adjusted GP margin (non-GAAP) was 50.9% in the fourth quarter of 2022, compared with 52.5% in the fourth quarter of 2021, and 50.7% in the third quarter of 2022. The slight increase over the previous quarter was mainly due to the seasonally lower utility cost partially offset by an increase in other components in cost of revenue.

Selling and marketing expenses, excluding share-based compensation expenses of RMB8.2 million (US\$1.2 million), were RMB24.8 million (US\$3.6 million) in the fourth quarter of 2022, a 16.6% decrease from the fourth quarter of 2021 of RMB29.7 million (excluding share-based compensation of RMB12.4 million) and a 14.9% decrease from the third quarter of 2022 of RMB29.1 million (excluding share-based compensation of RMB7.9 million). The increase over the previous quarter was mainly due to more professional fees related to ongoing transactions and corporate expenses related to overseas business expansion.

The increase over the previous quarter was mainly due to increased interest expenses resulting from higher total gross debt balance to finance data center capacity expansion.

Foreign currency exchange gain for the fourth quarter of 2022 was RMB4.7 million (US\$0.7 million), compared with a loss of RMB3.9 million in the fourth quarter of 2021 and a loss of RMB2.3 million in the third quarter of 2022.

Non-GAAP Disclosure

Our management and board of directors use Adjusted EBITDA, Adjusted EBITDA margin, Adjusted GP and Adjusted GP margin, which are non-GAAP financial measures, to evaluate our operating performance, establish budgets and develop operational goals for managing our business. We believe that the exclusion of the income and expenses eliminated in calculating Adjusted EBITDA and Adjusted GP can provide useful and supplemental measures of our core operating performance. In particular, we believe that the use of Adjusted EBITDA as a supplemental performance measure captures the trend in our operating performance by excluding from our operating results the impact of our capital structure (primarily interest expense), asset base charges (primarily depreciation and amortization, operating lease cost relating to prepaid land use rights, accretion expenses for asset retirement costs and impairment loss of long-lived assets), other non-cash expenses (primarily share-based compensation expenses), and other income and expenses which we believe are not reflective of our operating performance, whereas the use of adjusted gross profit as a supplemental performance measure captures the trend in gross profit performance of our data centers in service by excluding from our gross profit the impact of asset base charges (primarily depreciation and amortization, operating lease cost relating to prepaid land use rights and accretion expenses for asset retirement costs) and other non-cash expenses (primarily share-based compensation expenses) included in cost of revenue.

We note that depreciation and amortization is a fixed cost which commences as soon as each data center enters service. However, it usually takes several years for new data centers to reach high levels of utilization and profitability. The Company incurs significant depreciation and amortization costs for its early stage data center assets. Accordingly, gross profit, which is a measure of profitability after taking into account depreciation and amortization, does not accurately reflect the Company's core operating performance.

We also present these non-GAAP measures because we believe these non-GAAP measures are frequently used by securities analysts, investors and other interested parties as measures of the financial performance of companies in our industry.

These non-GAAP financial measures are not defined under U.S. GAAP and are not presented in accordance with U.S. GAAP. These non-GAAP financial measures have limitations as analytical tools, and when assessing our operating performance, cash flows or our liquidity, investors should not consider them in isolation, or as a substitute for gross profit, net income (loss), cash flows provided by (used in) operating activities or other consolidated statements of operations and cash flow data prepared in accordance with U.S. GAAP. There are a number of limitations related to the use of these non-GAAP financial measures instead of their nearest GAAP equivalent. First, Adjusted EBITDA, Adjusted EBITDA margin, Adjusted GP, and Adjusted GP margin are not substitutes for gross profit, net income (loss), cash flows provided by (used in) operating activities or other consolidated statements of operation and cash flow data prepared in accordance with U.S. GAAP. Second, other companies may calculate these non-GAAP financial measures differently or may use other measures to evaluate their performance, all of which could reduce the usefulness of these non-GAAP financial measures as tools for comparison. Finally, these non-GAAP financial measures do not reflect the impact of net interest expenses, incomes tax benefits (expenses), depreciation and amortization, operating lease cost relating to prepaid land use rights, accretion expenses for asset retirement costs, share-based compensation expenses, gain from purchase price adjustment and impairment loss of long-lived assets, each of which have been and may continue to be incurred in our business.

We mitigate these limitations by reconciling the non-GAAP financial measure to the most comparable U.S. GAAP performance measure, all of which should be considered when evaluating our performance.

For more information on these non-GAAP financial measures, please see the table captioned “Reconciliations of GAAP and non-GAAP results” set forth at the end of this press release.
